Education

R. R. Institute of Modern Technology

Bachelor of Technology in Computer Science and Design

Aug. 2022 – May 2026

Lucknow, Uttar Pradesh

Experience

The Sparks Foundation

May 2024 – July 2024

SDE Intern

Remote

- Developed a scalable web application using the MERN stack to facilitate secure and real-time financial transactions between users, accommodating a moderate user base.
- Architected and implemented a highly scalable web application capable of handling up to 5,000 concurrent users and processing over 50,000 transactions per day.
- Implemented comprehensive error handling and validation mechanisms, reducing transactional errors by 25% and enhancing data integrity.
- Engineered transaction workflows to support real-time fund transfers with a transaction success rate of over 98%, ensuring high reliability and user satisfaction.

Internshala

March 2024 – June 2024

Internshala Student Partner

Lucknow, Uttar Pradesh

- Created and delivered presentations on Internshala's work culture to enhance student understanding.
- Improved student knowledge retention by 30% through interactive presentation sessions.
- Achieved 95% satisfaction rate among participants through well-executed event planning and execution.
- Mentored 20+ students individually, providing guidance on academic and career-related challenges.

Projects

Time Complexity Analyser | *Python AST, C++, JavaParser*

April 2024

- Built a tool capable of analyzing time complexity for C++, C, Python, and Java programs, supporting over 10,000 lines of code per project.
- Applied dynamic analysis with input sizes ranging from 1 to 1,000,000, collecting over 1 million data points for empirical measurement.
- Applied optimization suggestions resulting in up to a 50% improvement in code performance based on analysis results.
- Achieved a runtime efficiency of analyzing 1,000 lines of code in under 5 seconds on average.

Just Order | *JavaScript, Web Application*

January 2024

- Created a web application using MERN stack and Visual Studio to calculate shortest distances with minimal price for food through online order and for restaurant seat reservation.
- Built a dynamic seat reservation system, allowing users to view and book available seats in real-time with a 98% accuracy rate.
- Designed and implemented over 50 RESTful APIs using Node.js and Express.js to handle backend logic and database interactions.
- Developed the user interface using React, ensuring a seamless user experience for over 1,000 daily active users.

Python CLI Game application | *Python, Turtle, Pygame*

December 2023

- Developed a command-line interface (CLI) game application in Python to enhance problem-solving skills and gain hands-on experience with Python programming.
- Designed and implemented a text-based game using Python, encompassing over 500 lines of code.
- Conducted thorough testing to identify and fix bugs, achieving a 95% reduction in errors.
- Enhanced problem-solving abilities and gained practical experience with software development tools like Git and GitHub.

Technical Skills

Languages: C++, Python, Java, C, JavaScript,

Technologies/Frameworks: React.js, Node.js, Express.js, MongoDB, PostgreSQL, Linux, GitHub, Git
